MENTAL HEALTH & DRUGS

Cannabis / Bhang

Student Study Guide & Quiz Answer Key

Module:	Mental Health & Drugs
Lesson:	Cannabis / Bhang
Quiz:	25 marks (10 MCQ + 5 Fill-in-blanks + 3 Short Answer)
Pass Mark:	15/25 (60%) — Certificate awarded at 60%+
Languages:	English Kiswahili Sheng

Learning Outcomes

By the end of this lesson, you will be able to:

1. Explain what cannabis is and how THC affects the brain
2. Identify the short-term and long-term effects on the body and mind
3. Explain why adolescents are especially at risk from cannabis use
4. Confidently refuse cannabis using evidence-based arguments
5. Know where to get help if you or someone you know is struggling

Quiz — Answer Key

Total: 25 marks | Pass: 15/25 (60%) | Certificate at 60%+

Part A: Multiple Choice (10 marks)

1. 1. Which specific brain region is THC most directly damaging in Koech's case?

- ☐ A. The cerebellum — controls balance and coordination
- ☐ B. The hippocampus and prefrontal cortex — memory and learning
- ☐ C. The brainstem — controls breathing and heart rate
- ☐ D. The occipital lobe — controls vision

2. 2. According to research, what percentage of teenagers who start using cannabis develop addiction?

- ☐ A. 2% — very rare
- ☐ B. 9% — less than for adults who start later
- ☐ C. 17% — nearly 1 in 6 teenagers
- ☐ D. 50% — half of all users

3. 3. Which statement best evaluates Wanjiku's claim?

- ☐ A. She is correct — CBD is completely safe for all ages
- ☐ B. Partially correct — CBD doesn't cause a high, but unregulated online products may contain THC and are not legally approved in Kenya
- ☐ C. Completely wrong — CBD and cannabis are the same thing
- ☐ D. It doesn't matter as long as she feels fine

4. 4. How many times more tar does cannabis smoke contain compared to cigarette smoke per puff?

- ☐ A. Same amount as cigarettes
- ☐ B. Twice as much (2×)
- ☐ C. Three times as much (3×)
- ☐ D. Half as much — cannabis is safer to smoke

5. 5. Why is Omondi's reasoning scientifically flawed?

- ☐ A. He is correct — studying more compensates for cannabis effects
- ☐ B. THC stays in the brain for up to 28 days — his Saturday studying is still done on a THC-impaired brain, so retention is reduced regardless of effort
- ☐ C. Cannabis only affects memory for 24 hours so Saturday studying is fine
- ☐ D. The only problem is that bhang is illegal, not that it affects studying

6. 6. Cannabis-induced psychosis is most likely to become permanent if it is not treated. What is the name of this permanent condition?

- ☐ A. Depression
- ☐ B. Schizophrenia
- ☐ C. Epilepsy
- ☐ D. Anxiety disorder

7. 7. What is the free, confidential NACADA drug helpline number in Kenya?

8. 8. What reasoning error is Jayden's friend making?

- ☐ A. No error — if one person is fine, cannabis is safe

- ☐ B. Anecdotal fallacy — using one person's experience to dismiss scientific evidence affecting many people
- ☐ C. Correct reasoning — mechanics don't need brain function
- ☐ D. The brother started as an adult so there is no risk at all

9. 9. The brain region that controls judgment, decision-making, and impulse control — disrupted by THC during adolescence — is the:

- ☐ A. Amygdala
- ☐ B. Cerebellum
- ☐ C. Prefrontal Cortex
- ☐ D. Occipital Lobe

10. 10. What is the BEST first step Amina should take?

- ☐ A. Tell all their mutual friends so Sifa feels pressure to stop
- ☐ B. Have a private, caring conversation with Sifa first — then suggest the school counsellor together
- ☐ C. Mind her own business — Sifa will stop when she's ready
- ☐ D. Call the police immediately

Part C: Short Answer (25 marks)

1. 1. The psychoactive compound in cannabis that causes the "high" is called . (3 marks)

2. 2. Cannabis smoke contains times more tar than cigarette smoke per puff. (3 marks)

3. 3. The human brain does not fully develop until age . (3 marks)

4. 4. THC remains in the brain for up to days after use. (3 marks)

5. 5. Cannabis is classified as illegal in Kenya under the Narcotic Drugs and Psychotropic Substances Act Cap . (3 marks)

6. 6. Zawadi started smoking bhang at 14. At 20, she was admitted to hospital with cannabis-induced psychosis. Explain: (a) what cannabis-induced psychosis is, (b) why starting at 14 increased her risk significantly. (3 marks)

7. 7. Your classmate says: "Bangini natural — inatoka kwa mmea, kwa hivyo haina madhara." Write a response using THREE specific pieces of scientific evidence to challenge this claim. (4 marks)

8. 8. Baraka (Form 4, Eastleigh) wants to stop smoking bhang before KCSE. He has tried twice but says the cravings are too strong. What TWO specific steps would you advise him to take, and why? (3 marks)
