

ARISE

Adolescent Reproductive Health Information Support & Empowerment

HIV/AIDS & STIs

HIV/AIDS & STIs

Student Study Guide & Quiz Answer Key

Module:	HIV/AIDS & STIs
Lesson:	HIV/AIDS & STIs
Quiz:	25 marks (10 MCQ + 5 Fill-in-blanks + 3 Short Answer)
Pass Mark:	15/25 (60%) — Certificate awarded at 60%+
Languages:	English Kiswahili Sheng

Learning Outcomes

By the end of this lesson, you will be able to:

1. Define HIV, AIDS, and common STIs
2. Explain how HIV is and is not transmitted
3. Describe prevention methods including ARVs, PrEP, and U=U
4. Challenge HIV stigma using accurate information

Slide 2: HIV & AIDS — The Basics

Understanding HIV is the first step to protecting yourself and others.

KEY TERM: HIV

Human Immunodeficiency Virus — attacks white blood cells (CD4) that fight infection. No cure, but controlled with ARVs.

KEY TERM: AIDS

Acquired Immunodeficiency Syndrome — the final stage of untreated HIV when the immune system collapses and the body cannot fight infections.

Fact	Detail
Kenya HIV rate	~4.9% of adults 15–49 (2023)
Youth burden	Young people 15–24 account for 30% of new infections
ARV access	2.1 million Kenyans on ARVs (2023)
Testing	Free at all public health facilities

Slide 3: How HIV Spreads & STIs

Knowing how HIV spreads helps you make informed choices.

KEY TERM: Other STIs

Gonorrhoea, syphilis (bacterial — curable with antibiotics); Herpes, HPV (viral — treatable, not curable); Chlamydia (bacterial — curable). All increase HIV transmission risk.

Transmission Route	Risk Level
Unprotected vaginal/anal sex	Very High
Sharing needles (IV drugs)	Very High
Mother to child (birth/breastfeed)	Moderate (reduced by ARVs)
Unscreened blood transfusion	High (rare in hospitals now)
Hugging / sharing food	ZERO

Slide 4: Prevention & Treatment

You have tools to protect yourself. Use them.

Method	Effectiveness
Abstinence	100%
Consistent correct condom use	~98%
PrEP (daily pill for HIV-negative)	~99% (taken consistently)
ARVs (for HIV-positive: U=U)	Eliminates sexual transmission
HIV testing	Enables early treatment

■ ■ U=U

Slide 5: Living Positively & Fighting Stigma

HIV stigma kills — by stopping people from testing and seeking help. End the stigma.

Omondi, 18, tested HIV-positive during a routine clinic visit. He started ARVs immediately. Five years later, he is in university, his viral load is undetectable, and he volunteers as a peer educator on HIV prevention.

Slide 6: Module Video

Watch carefully, then continue to the scenarios.

Slide 7: Real Talk — What Would You Do?

Pick your choice and see the consequence.

Slide 8: Protecting Yourself — Practical Steps

HIV is preventable. Here is your personal action plan.

Quiz — Answer Key

Total: 25 marks | Pass: 15/25 (60%) | Certificate at 60%+

Part A: Multiple Choice (10 marks)

1. 1. HIV stands for:

- ☐ A. Human Immunity Virus
- ☒ B. Human Immunodeficiency Virus
- ☐ C. High Infection Virus
- ☐ D. Human Infection Virus

2. 2. AIDS is the advanced stage of HIV infection when:

- ☐ A. The person gains weight
- ☒ B. The immune system is severely damaged and opportunistic infections occur
- ☐ C. The virus disappears
- ☐ D. The person feels very healthy

3. 3. HIV is transmitted through:

- ☐ A. Sharing food or drinks
- ☐ B. Mosquito bites
- ☒ C. Unprotected sex, infected blood, and mother-to-child
- ☐ D. Hugging or shaking hands

4. 4. ARVs (antiretrovirals) are medicines that:

- ☐ A. Cure HIV completely
- ☒ B. Control HIV, allowing people to live long healthy lives
- ☐ C. Prevent HIV infection
- ☐ D. Kill the HIV virus instantly

5. 5. Which STI is caused by a bacterium and can be cured with antibiotics?

- ☐ A. HIV
- ☐ B. Herpes
- ☒ C. Gonorrhoea
- ☐ D. HPV

6. 6. The ONLY 100% effective way to prevent HIV/STI transmission through sex is:

- ☐ A. Washing after sex
- ☐ B. Guessing safe days
- ☒ C. Abstinence
- ☐ D. Prayer alone

7. 7. PrEP stands for:

- ☐ A. Pre-Recorded Exposure Plan
- ☒ B. Pre-Exposure Prophylaxis
- ☐ C. Post-Rapid Exposure Prevention
- ☐ D. Partial Resistance to Exposure Pills

8. 8. HIV-related stigma is harmful because:

- ☐ A. It helps people recover faster

☒ B. It discourages people from testing and seeking treatment

☐ C. It makes HIV tests more accurate

☐ D. It reduces infection rates

9. 9. In Kenya, HIV testing for adolescents is:

☐ A. Illegal under 18

☒ B. Available free at public health facilities

☐ C. Expensive and requires parental consent

☐ D. Only available in Nairobi

10. 10. An HIV-positive person living on ARVs can:

☐ A. Never have children

☐ B. Never work or go to school

☒ C. Live a long healthy life, work, study, and have children

☐ D. Infect everyone around them

Part C: Short Answer (25 marks)

1. 1. HIV attacks the body's _____ system, reducing its ability to fight infections. (3 marks)

2. 2. ARV stands for _____-retroviral medication. (3 marks)

3. 3. The only 100% effective prevention against sexual HIV transmission is _____. (3 marks)

4. 4. PrEP is a medicine taken _____ to prevent HIV in HIV-negative people. (3 marks)

5. 5. When HIV viral load is undetectable, the virus is _____. (3 marks)

6. Explain THREE ways HIV can be transmitted and ONE way it CANNOT be transmitted. (3 marks marks) (3 marks)

7. Describe what ARVs do and explain why people with HIV should start them early. (4 marks marks) (4 marks)

8. Explain TWO reasons why HIV stigma is dangerous for communities. (3 marks marks) (3 marks)
