Female Genital Mutilation (FGM)

Student Study Guide & Quiz Answer Key

Module:	GBV & Safety
Lesson:	Female Genital Mutilation (FGM)
Quiz:	25 marks (10 MCQ + 5 Fill-in-blanks + 3 Short Answer)
Pass Mark:	15/25 (60%) — Certificate awarded at 60%+
Languages:	English Kiswahili Sheng

Learning Outcomes

By the end of this lesson, you will be able to:

1. Define FGM and describe its four types
2. Explain the immediate and long-term harms of FGM
3. State Kenya's legal framework against FGM and reporting channels
4. Apply strategies to protect at-risk girls and challenge harmful norms

Slide 2: What Is FGM?

FGM is the partial or total removal or injury of the external female genital organs for non-medical reasons. It has NO health benefits and causes lifelong harm.

Type	Description	Prevalence
Type I — Clitoridectomy	Partial/total removal of clitoris	Most common globally
Type II — Excision	Removal of clitoris and labia minora	Common in East Africa
Type III — Infibulation	Narrowing vaginal opening by sealing — most severe	Northern Kenya, Somalia
Type IV — Other	Pricking, piercing, scraping — any non-medical injury	Varies by community

Slide 3: Harms of FGM

FGM has NO medical benefit. Every single consequence is negative.

Timeline	Harm
Immediate (during/after cutting)	Severe bleeding, infection, urinary retention, shock, death
Short-term (weeks/months)	Wound infections, painful urination, recurrent UTIs, PTSD onset
Long-term (years/lifetime)	Chronic pain, sexual pain (dyspareunia), obstetric fistula, difficult labour, depression, anxiety

■ ■ ■ No exceptions

■ There is no 'mild' or 'safe' FGM. Even a small cut to the clitoris is FGM. Medicalised FGM (done by a nurse or doctor) is STILL illegal and STILL harmful.

Slide 4: Why FGM Happens & How to End It

Understanding the root causes helps us find effective solutions.

Root Cause	Counter-strategy
Social norm — everyone does it	Community dialogue and norm-shifting

Root Cause	Counter-strategy
Marriageability — uncut girls unmarriageable	Men pledge not to demand FGM for marriage
Rite of passage — marks womanhood	Alternative Rites of Passage (ARP)
Gender inequality — controlling female sexuality	Girls' empowerment and education
Ignorance of harms	Health education using accurate evidence
■ ■ <i>Alternative Rites</i>	

Slide 5: Legal Framework & Reporting

FGM is a crime in Kenya. Knowing the law protects girls.

KEY TERM: Prohibition of FGM Act 2011

Criminalises performing FGM, aiding or abetting FGM, taking a girl across borders for FGM, and failing to report at-risk girls. Maximum 3 years imprisonment or KES 200,000 fine, or both.

Slide 6: Module Video

Watch carefully, then continue to the scenarios.

Slide 7: Real Talk — What Would You Do?

Pick your choice and see the consequence.

Slide 8: Being a Change Agent

FGM will end when enough people speak up — in families, schools, and communities.

A group of 20 male students in Narok signed a public pledge not to require FGM for any future wife. Their headteacher read the pledge at a community baraza. Three families who had planned FGM ceremonies changed their minds after hearing the boys. One father said: 'If our sons do not need it, why are we doing it?'

Quiz — Answer Key

Total: 25 marks | Pass: 15/25 (60%) | Certificate at 60%+

Part A: Multiple Choice (10 marks)

1. 1. FGM stands for:

- ☐ A. Female General Medicine
- ☒ B. Female Genital Mutilation
- ☐ C. Female Growth Monitoring
- ☐ D. Female Gender Management

2. 2. FGM is harmful because it:

- ☐ A. Is painful but heals quickly with no lasting effects
- ☒ B. Causes permanent physical and psychological harm with no health benefit
- ☐ C. Reduces infection risk
- ☐ D. Is approved by the WHO

3. 3. FGM is illegal in Kenya under:

- ☐ A. Land Act 2012
- ☒ B. Prohibition of Female Genital Mutilation Act 2011
- ☐ C. Traffic Act
- ☐ D. Companies Act

4. 4. An immediate physical complication of FGM includes:

- ☐ A. Improved fertility
- ☒ B. Severe bleeding, infection, and shock
- ☐ C. Better menstrual health
- ☐ D. Reduced STI risk

5. 5. A long-term consequence of FGM is:

- ☐ A. Increased sexual pleasure
- ☒ B. Chronic pain, difficult childbirth, fistula, and PTSD
- ☐ C. Better hygiene
- ☐ D. Faster healing from illness

6. 6. The main reason communities practise FGM is:

- ☐ A. Medical advice from doctors
- ☒ B. Social and cultural norms, marriageability, and gender control
- ☐ C. Scientific research findings
- ☐ D. Government policy

7. 7. 'Medicalised FGM' (done by a health worker) is:

- ☐ A. Safe and acceptable
- ☒ B. Still illegal and harmful — medicalisation does not make FGM safe
- ☐ C. Recommended by WHO for safety
- ☐ D. Less painful than traditional FGM

8. 8. An alternative rite of passage that preserves culture without cutting is called:

- ☐ A. Circumcision

☒ B. Alternative Rites of Passage (ARP)

☐ C. Defibulation

☐ D. Infibulation

9. 9. If you know a girl is at risk of FGM, you should:

☐ A. Mind your own business

☒ B. Report immediately to a teacher, social worker, or call Childline 116

☐ C. Tell the girl's mother only

☐ D. Wait and see what happens

10. 10. Boys and men have a role in ending FGM by:

☐ A. Supporting families who practise it

☒ B. Refusing to marry only cut women, speaking out against FGM, and supporting girls

☐ C. Staying neutral and not commenting

☐ D. Only supporting FGM if the girl agrees

Part C: Short Answer (25 marks)

1. 1. FGM stands for Female Genital _____. (3 marks)

2. 2. The Kenyan law that criminalises FGM was passed in _____. (3 marks)

3. 3. FGM causes permanent harm and has _____ health benefits. (3 marks)

4. 4. Community ceremonies that replace cutting while preserving culture are called Alternative _____ of Passage. (3 marks)

5. 5. If a girl is at risk of FGM, you should call Childline _____ for help. (3 marks)

6. Describe THREE immediate and THREE long-term physical harms of FGM. (3 marks marks) (3 marks)

7. Explain why the argument 'FGM is our culture so it is acceptable' is not valid. (4 marks marks) (4 marks)

8. Describe TWO ways a young person can help end FGM in their community. (3 marks marks) (3 marks)
