

Quiz Questions & Answer Key

All 22 Lessons — Select All That Apply (SATA) Format

Correct answers highlighted in **green** | 2 correct per question

Generated: May 2026 · ARISE v3 · Adolescent Reproductive Health Information Support & Empowerment

Total: 22 lessons · **220 questions** · 440 correct answers · Each question has 4 options (A, B, C, D) — exactly 2 are correct · Helplines: NACADA **1192** · Childline **116** · GBV **1195**

Lesson 1: Tobacco & Smoking

Ochieng (Form 3, Homa Bay) has been coughing daily for 3 months with thick mucus. His chest X-ray shows inflamed airways and blocked bronchi. His doctor says his airways are permanently damaged from 5 years of smoking.

1. Which of the following are smoking-related lung diseases affecting Ochieng? ✓ B, D

A. A Emphysema — destruction of alveoli

✓ B. B Chronic Bronchitis — permanent airway inflammation with mucus

C. C Lung Cancer — uncontrolled cell growth

✓ D. D Emphysema — permanent destruction of alveoli, reducing lung capacity

2. Carbon monoxide in cigarette smoke is dangerous primarily because it: ✓ C, D

A. A Causes the airways to swell and block breathing

B. B Destroys the alveoli walls permanently

✓ C. C Binds to red blood cells instead of oxygen, reducing oxygen delivery

✓ D. D Carbon monoxide also raises blood pressure by constricting blood vessels throughout the body

Akinyi (30, Kisumu) has smoked since Form 2. Her doctor at Jaramogi Hospital tells her she has atherosclerosis in her coronary arteries.

3. Which of the following are serious health consequences of Akinyi's long-term smoking? ✓ B, C

A. A Chronic cough and mucus production

✓ B. B Heart attack from a blocked coronary artery

✓ C. C Premature skin ageing and wrinkles

D. D Improved blood circulation and better oxygen delivery after each cigarette

4. Which of the following are TRUE effects of nicotine on the brain and body? ✓ C, D

A. A Cortisol — the stress hormone

B. B Serotonin — the mood stabiliser

✓ C. C Dopamine — the reward chemical

✓ D. D Nicotine also triggers adrenaline release — raising heart rate and blood pressure

Nasieku is pregnant and lives with her husband who smokes 10 cigarettes a day inside their home in Kajiado.

5. Which of the following are genuine risks to Nasieku's unborn baby from second-hand smoke?

✓ A, B

✓ A. A Nicotine crosses the placenta and can cause the baby to develop nicotine dependency

✓ B. B Carbon monoxide crosses the placenta, reducing fetal oxygen supply — risking premature birth and low birth weight

C. C The baby will develop asthma immediately after birth

D. D Second-hand smoke has no effect on babies inside the womb

6. Which of the following are TRUE legal consequences for selling cigarettes to under-18s under Kenya's Tobacco Control Act? ✓ B, D

A. A A written warning with no financial penalty

✓ B. B A fine of up to KES 500,000 or 2 years imprisonment

C. C The trader must pay KES 5,000 to the local chief

✓ D. D All tobacco products sold to under-18s are confiscated and the seller faces criminal prosecution

Kamau buys 1 packet of cigarettes (KES 400) every 3 days in Nakuru.

7. Kamau smokes 1 pack every 3 days at KES 400 per pack. Which of the following are TRUE about his habit? ✓ C, D

A. A KES 24,000

B. B KES 36,000

✓ C. C KES 48,667

✓ D. D That annual cost could fund a full secondary school year or a small business startup

8. Which of the following accurately describe the health benefits of quitting smoking? ✓ C, D

A. A 10% — negligible improvement

B. B 25% — modest improvement

✓ C. C 50% — heart disease risk halves

✓ D. D Within 20 minutes of quitting, blood pressure and heart rate begin dropping toward normal

9. Why are smokers 3× more likely to develop tuberculosis (TB) than non-smokers?**✓ B, D**

A. A TB bacteria are found in cigarettes and directly inhaled

✓ B. B Smoking destroys the cilia lining the airways that normally sweep bacteria out of the lungs

C. C Nicotine actively feeds TB bacteria in the bloodstream

✓ D. D Smoking also suppresses immune cell function — making the body less able to fight infections

A classmate tells Wanjiru: "My uncle smoked from age 20 to 70 and never got sick — so smoking must be safe for some people."

10. What type of reasoning error is the classmate making?**✓ B, D**

A. A Statistical analysis — using population data correctly

✓ B. B Anecdotal fallacy — using one person's experience to dismiss population-level evidence

C. C Scientific reasoning — genetic variation proves safety for some

✓ D. D This also shows confirmation bias — only accepting evidence that confirms a pre-existing belief

Lesson 2: Cannabis

Koech (Form 3, Eldoret) smokes bhang every Friday. By Monday, he cannot remember what the teacher taught the previous week, even though he pays attention in class.

1. Which of the following brain regions are directly damaged by THC based on Koech's symptoms?

✓ B, D

A. The cerebellum — controls balance and coordination

C. The brainstem — controls breathing and heart rate

✓ B. The hippocampus and prefrontal cortex — memory and learning

✓ D. The amygdala — regulates emotions and fear; THC overstimulates it causing anxiety

2. Which of the following are TRUE about cannabis addiction rates among teenagers?

✓ C, D

A. 2% — very rare

B. 9% — less than for adults who start later

✓ C. 17% — nearly 1 in 6 teenagers

✓ D. Starting cannabis before age 16 significantly increases lifetime addiction risk

Wanjiku (17, Nakuru) tells her friend: "I only use CBD oil I buy online — it's medical so it's safe and legal."

3. Which of the following statements correctly identify problems with Wanjiku's claim about CBD?

✓ B, D

A. She is correct — CBD is completely safe for all ages

C. Completely wrong — CBD and cannabis are the same thing

✓ B. Partially correct — CBD doesn't cause a high, but unregulated online products may contain THC and are not legally approved in Kenya

✓ D. Without independent lab testing, online CBD products cannot be verified for purity or THC content

4. Which of the following are TRUE about harmful substances in cannabis smoke compared to cigarettes?

✓ C, D

A. Same amount as cigarettes

B. Twice as much (2×)

✓ C. Three times as much (3×)

✓ D. Cannabis smokers inhale more deeply and hold smoke longer, multiplying lung damage

Omondi (Form 4, Kisumu) smokes bhang on Fridays. He says: "I study harder on Saturdays to make up for it — so it doesn't affect my KCSE results."

5. Which of the following correctly explain why Omondi's reasoning is scientifically flawed? ✓ B, D

A. He is correct — studying more compensates for cannabis effects

✓ B. THC stays in the brain for up to 28 days — his Saturday studying is still done on a THC-impaired brain, so retention is reduced regardless of effort

C. Cannabis only affects memory for 24 hours so Saturday studying is fine

✓ D. Cannabis impairs working memory and concentration — both essential for effective studying

6. Which of the following are serious mental health conditions that cannabis use can trigger or worsen?

✓ B, D

A. Depression

✓ B. Schizophrenia

C. Epilepsy

✓ D. Anxiety disorder

7. Which of the following are valid NACADA helpline numbers for drug abuse support in Kenya?

✓ B, D

A. A 999

✓ B. B 1192

C. C 1195

✓ D. D 0800 723 253

Jayden's friend says: "My older brother smokes weed every day and he's fine — he's even a mechanic now."

8. Which of the following correctly identify reasoning errors in Jayden's friend's argument? ✓ B, D

A. No error — if one person is fine, cannabis is safe for everyone

✓ B. Anecdotal fallacy — using one person's experience to dismiss scientific evidence affecting many people

C. Correct reasoning — mechanics don't need brain function

✓ D. This also shows confirmation bias — seeking one example that confirms a pre-existing belief

9. Which of the following brain regions are disrupted by THC during adolescence, causing permanent effects on memory and judgment? ✓ C, D

A. Amygdala

B. Cerebellum

✓ C. Prefrontal Cortex

✓ D. The hippocampus — THC impairs memory formation causing short-term memory failure

Amina notices her friend Sifa has mood swings, memory problems, and smells of bhang. Sifa denies it. Amina cares about her friend and wants to help.

10. Which of the following are appropriate actions Amina should take to support Sifa?

✓ B, D

A. Tell all their mutual friends so Sifa feels pressure to stop

✓ **B. Have a private, caring conversation with Sifa first — then suggest the school counsellor together**

C. Mind her own business — Sifa will stop when she's ready

✓ **D. Suggest Sifa contacts NACADA helpline (0800 723 253) for free, confidential counselling**

Lesson 3: Cocaine & Heroin

1. Which of the following are TRUE about how cocaine affects the body?

✓ B, D

A. Slowing the brain down

✓ B. Flooding the brain with dopamine, creating intense euphoria and rapid addiction

C. Causing sedation and sleep

✓ D. Cocaine also causes severe constriction of blood vessels, raising stroke and heart attack risk

2. Which of the following are TRUE about heroin's drug classification and effects on the body?

✓ B, D

A. Stimulants

✓ B. Opioids — derived from opium/morphine

C. Hallucinogens

✓ D. Heroin also severely depresses the central nervous system — breathing can slow to a fatal stop

3. Which of the following are serious health risks from sharing needles to inject heroin?

✓ B, D

A. Needles are expensive

✓ B. It directly transmits HIV, Hepatitis B and C, and other blood-borne infections

C. Only the first person is at risk

✓ D. Shared needles also transmit tetanus and serious bacterial infections causing sepsis

4. Which of the following are TRUE about a cocaine or heroin overdose?

✓ B, D

A. Only a headache

✓ B. Respiratory failure, cardiac arrest, seizures, coma, and death

C. Better sleep

✓ D. Naloxone (Narcan) can reverse a heroin overdose — it must be given immediately

5. Which of the following accurately describe heroin withdrawal symptoms?

✓ B, D

A. Easy and brief

✓ B. Extremely physically painful — muscle cramps, vomiting, sweating, insomnia lasting days

C. Comfortable with no symptoms

✓ D. Withdrawal symptoms peak at 24–72 hours and may last two weeks without medical support

6. Which of the following are TRUE about crack cocaine?

✓ B, D

A. A type of biscuit

✓ B. A smokable, highly addictive form of cocaine with faster and more intense effects

C. A weaker form of cocaine

✓ D. The intense crack high lasts only 5–10 minutes, driving compulsive re-use within minutes

7. Which of the following explain why cocaine and heroin addiction develops so rapidly?

✓ B, D

A. They are natural substances

✓ B. They hijack the brain's dopamine reward system — the brain stops producing natural pleasure without the drug

C. Users want to get sick

✓ D. After cocaine or heroin use, the brain can no longer generate normal pleasure without the drug

8. Which of the following provide treatment or support for hard drug addiction in Kenya?

✓ B, D

A. Kenya Revenue Authority

✓ B. NACADA — National Authority for Campaign Against Drug Abuse

C. KNEC

✓ D. Mathare Hospital and Coast General also run free drug rehabilitation programmes

9. Which of the following are correct actions when you find a friend collapsed after taking drugs?

✓ B, D

A. Wait and see if they wake up

✓ B. Call 999/112 immediately and do not leave them alone

C. Try to make them vomit

✓ D. Place the person on their side (recovery position) to prevent choking while waiting for help

10. Which of the following are TRUE about protecting yourself from cocaine and heroin addiction?

✓ B, D

A. Trying once to see what it is like

✓ B. Never starting — these drugs create addiction after very few uses

C. Only using on weekends

✓ D. If already using: seek help immediately — call NACADA free: 0800 723 253

Lesson 4: Drug Avoidance

1. Which of the following accurately describe drug abuse?

✓ B, D

A. Taking prescribed medication exactly as directed by a doctor

✓ B. Using any substance — legal or illegal — in a way that harms physical, mental, or social wellbeing

C. Drinking coffee or tea every morning

✓ D. Drug abuse also includes misusing prescription medication beyond what a doctor prescribed

2. Which of the following signs may indicate drug abuse in a classmate?

✓ B, D

A. Eating more food and getting better grades

✓ B. Sudden grade drop, secretive behaviour, red or bloodshot eyes, withdrawing from usual friends, money going missing, and mood swings

C. Being very talkative and energetic only

✓ D. Unexplained mood changes, irritability, and withdrawal from family and close friends

3. Which of the following explain how peer pressure leads to drug use?

✓ B, D

A. Physical force that cannot be resisted

✓ B. The desire to belong, fear of rejection, wanting to appear mature, and not wanting to seem different from the group

C. Teachers encouraging students to try substances

✓ D. Curiosity and the belief that "everyone is doing it" — social norms distorted by peers

4. Which of the following are PROTECTIVE factors against drug abuse?

✓ B, D

A. Having no rules or curfews at home

✓ B. Strong family bonds, clear personal values, positive activities like sport or faith, and a trusted adult to talk to

C. Spending most time alone with no supervision

✓ D. Positive school engagement and a strong connection to a trusted teacher or mentor

5. Which of the following are RISK factors that increase the likelihood of drug abuse?

✓ B, D

A. Having a trusted school counsellor

✓ B. Family history of addiction, unresolved trauma or depression, school failure, drug-using peer group, and social isolation

C. Participating actively in school sports teams

✓ D. Easy access to drugs in the neighbourhood or home environment

6. Which of the following are key elements of an effective drug refusal strategy?

✓ B, D

A. Run away without saying anything

✓ B. Give an assertive NO with a reason, offer an alternative activity, and have a pre-planned exit strategy ready

C. Accept it once to avoid conflict then never again

✓ D. Use a prepared exit line: "Sorry, I have to go — see you!" and remove yourself calmly

7. Which of the following describe effective exit strategies when facing drug pressure?

✓ B, D

A. Running as fast as you can without explanation

✓ B. A pre-planned believable reason to leave a high-pressure situation — for example, 'I need to get home, my mum is calling me'

C. Calling the police immediately

✓ D. Having a trusted adult or friend you can text to "rescue" you from uncomfortable situations

8. Which of the following substances are commonly abused by Kenyan students but often underestimated as dangerous?

✓ B, D

A. Vitamins

✓ B. Alcohol, bhang (cannabis), glue/petrol sniffing, and prescription drug misuse — all widely available and socially normalised in some settings

C. Herbal teas

✓ D. Prescription drugs like cough syrups, tramadol, and sleeping tablets when misused

9. Which of the following are appropriate approaches when supporting a friend you suspect is using drugs?

✓ B, D

A. Tell everyone at school so they can help

✓ B. Have a private, non-judgmental conversation expressing genuine concern, listen carefully, and encourage them to speak with a trusted adult or counsellor

C. Ignore it completely — it is not your business

✓ D. Suggest they contact NACADA helpline (0800 723 253) for confidential free professional support

10. Which of the following are valid helpline numbers for drug abuse support in Kenya?

✓ B, D

A. 0722 178 177

✓ B. 0800 723 253

C. 999

✓ D. 116 — Childline Kenya also provides substance abuse counselling for young people

Lesson 5: Stress & Mental Health

1. Which of the following accurately describe mental health according to the WHO definition? ✓ B, D

A. The complete absence of any sadness or worry

✓ B. A state of wellbeing where a person realises their abilities, copes with normal stress, works productively, and contributes to their community

C. Only the absence of diagnosed mental illness

✓ D. The ability to cope with normal stresses, work productively, and contribute to the community

2. Which of the following correctly describe the difference between normal stress and a stress disorder? ✓ B, D

A. Normal stress has no physical effects

✓ B. Normal stress is temporary and proportionate to the challenge; a disorder is persistent, overwhelming, and significantly impairs daily life

C. Only adults experience stress disorders

✓ D. Mental health disorders are treatable — with the right therapy and support, recovery is possible

3. Which of the following are characteristics of clinical depression? ✓ B, D

A. Feeling sad for a day or two after bad news

✓ B. Persistent low mood, loss of interest in previously enjoyable activities, fatigue, sleep or appetite changes, and feelings of worthlessness lasting 2+ weeks

C. Only affecting people who have had trauma

✓ D. Depression often includes changes in sleep, appetite, low energy, and feelings of worthlessness

4. Which of the following are TRUE about how anxiety disorder differs from normal worry? ✓ B, D

A. Felt only before exams

✓ B. Persistent, excessive, and disproportionate to any real threat — accompanied by physical symptoms like racing heart, sweating, and avoidance that disrupt daily life

C. Only experienced by girls

✓ D. Anxiety disorders cause physical symptoms: racing heart, sweating, and difficulty breathing

5. Which of the following are TRUE about Post-Traumatic Stress Disorder (PTSD)? ✓ B, D

A. Failing a single exam

✓ B. Exposure to a traumatic event such as violence, abuse, accident, or serious loss — causing flashbacks, nightmares, and hypervigilance

C. Watching too much television

✓ D. PTSD symptoms include flashbacks, nightmares, emotional numbness, and avoiding reminders

6. Which of the following explain how exercise reduces stress and improves mental health? ✓ B, D

A. Tires you out so you forget your problems

✓ B. Releases endorphins (natural mood elevators), reduces cortisol (stress hormone), improves sleep quality, and builds self-efficacy

C. Only helps physical fitness, not mental health

✓ D. Even 20–30 minutes of moderate exercise three times per week significantly improves mood

7. Which of the following are WARNING SIGNS of a mental health crisis in a young person? ✓ B, D

A. Getting excited about a school trip

✓ B. Giving away valued possessions, expressing hopelessness, extreme withdrawal, expressing thoughts of self-harm or suicide

C. Wanting to sleep 8–9 hours a night

✓ D. Sudden calmness after severe depression may signal a dangerous decision has been made

8. Which of the following explain why mental health stigma is harmful? ✓ B, D

A. Encourages people to seek help faster

✓ B. Prevents people from seeking treatment, causes shame and isolation, and leads to preventable suffering and deaths from untreated conditions

C. Only affects adults over 40

✓ D. Stigma delays healthcare-seeking by months or years, allowing conditions to worsen untreated

9. Which of the following are appropriate actions when a friend expresses suicidal thoughts? ✓ B, D

A. Tell them to think positively and cheer up

✓ B. Listen without judgment, stay with them, take it seriously, and immediately connect them to a trusted adult or call Befrienders Kenya: 0722 178 177

C. Change the subject to distract them

✓ D. Call Befrienders Kenya (0722 178 177) or Childline (116) together — do not leave them alone

10. Which of the following are valid Kenyan helpline numbers for mental health crisis support?

✓ B, D

A. NACADA: 0800 723 253

C. Childline: 116

✓ B. Befrienders Kenya: 0722 178 177

✓ D. 0800 720 715 — Kenya Red Cross mental health helpline also available free

Lesson 6: Healthy Relationships

1. Which of the following are characteristics of a healthy relationship?

✓ B, D

- A. One partner making all major decisions
- C. Being together every moment to show love

✓ B. Mutual respect, trust, open communication, safety, and both people feeling equally valued

✓ D. Having space for individual interests and friendships outside the relationship

2. Which of the following are serious warning signs of an abusive relationship?

✓ B, D

- A. Having separate hobbies from your partner
- C. Disagreeing about what to eat or watch

✓ B. Your partner hitting you even once, isolating you from family and friends, or threatening you

✓ D. A partner who demands access to your phone, passwords, or tracks your location without consent

3. Which of the following are TRUE about consent in a relationship?

✓ B, D

- A. Given because you felt pressured
- C. Permanent once given — cannot be changed later

✓ B. Freely given, reversible (can be withdrawn anytime), informed, enthusiastic, and specific to each situation

✓ D. Consent can be withdrawn at any point — even during an activity that has already started

4. Which of the following are TRUE about "love bombing" as a manipulation tactic?

✓ B, D

- A. Partners send each other flowers on Valentine's Day
- C. Being very romantic after a long relationship

✓ B. Someone overwhelms you with excessive attention, gifts, and declarations of love very early — to create dependency and gain control before gradually becoming controlling

✓ D. Love bombing is typically followed by sudden withdrawal of affection — creating a control cycle

5. Which of the following describe healthy interdependence in a relationship?

✓ B, D

- A. One person depending completely on the other for their happiness and identity
- C. Complete independence with no emotional intimacy or connection

✓ B. Both people maintain their individual identities, friendships, and goals while building a genuine shared connection

✓ D. Each person's emotional happiness remains their own responsibility — not their partner's job

6. Which of the following are TRUE about online grooming? ✓ B, D

A. Learning makeup techniques online

✓ B. An adult building trust with a young person online through gifts, special attention, and gradually pushing boundaries — in order to exploit them

C. A teenager chatting with friends of the same age

✓ D. Groomers make young people feel specially understood and different from their peers

7. Which of the following correctly describe elements of the FRIES model of consent? ✓ B, D

A. Fun, Romantic, Interesting, Exciting, Safe

✓ B. Freely given, Reversible, Informed, Enthusiastic, Specific

C. Friendly, Responsive, Intense, Equal, Secure

✓ D. Without all five FRIES elements, consent is not valid — enthusiasm and specificity are essential

8. Which of the following are appropriate responses when a friend says their partner hits them "but really loves them"? ✓ B, D

A. Agree — love sometimes hurts

✓ B. Challenge the false belief that love and violence are compatible, listen without judging, and encourage them to access support

C. Tell them to try harder to make their partner happy

✓ D. Refer your friend to GVRRC support or the GBV helpline (1195) for professional help

9. Which of the following describe what it means to set a personal boundary in a relationship? ✓ B, D

A. Ending the relationship immediately if you disagree

✓ B. Clearly communicating what you are and are not comfortable with — and expecting that to be respected

C. Never sharing your feelings to protect yourself

✓ D. Writing down your personal limits helps clarify them and makes them easier to communicate

10. Which of the following are TRUE about healthy romantic relationships for Kenyan adolescents? ✓ B, D

A. Having a romantic partner is necessary for social acceptance at school

✓ B. You are complete as an individual — choosing a relationship should add to your life, not define your worth or fill an emptiness

C. Jealousy always means your partner truly loves you

✓ D. Choosing a relationship from wholeness — not neediness — leads to healthier bonds

Lesson 7: Abstinence

1. Which of the following are TRUE about abstinence as a method of protection from pregnancy and STIs? ✓ C, D

A. Condoms

B. Contraceptive pill

✓ C. Consistent abstinence

✓ D. Abstinence eliminates both pregnancy and STI risk completely — no other method achieves both simultaneously

David tells Wanjiku: "If you loved me, you would."

2. Which of the following correctly describe David's behaviour toward Wanjiku? ✓ B, D

A. Genuine love and vulnerability

✓ B. Emotional manipulation / coercion

C. Normal teenage communication

✓ D. Using emotional pressure that violates Wanjiku's right to make her own decision

3. Which of the following are TRUE about condom effectiveness in protecting against pregnancy and STIs? ✓ C, D

A. 100% — completely prevents pregnancy

B. 50% — roughly half effective

✓ C. 85–98%

✓ D. Condoms reduce but do not eliminate STI risk — unlike abstinence, which eliminates it completely

Omondi's friends tease him saying "bado hujafanya — wewe ni mtoto bado."

4. Which of the following represent appropriate responses for Omondi to this peer pressure? ✓ B, C

A. Find a girl this weekend to prove them wrong

✓ B. "Niko sawa — KCSE yangu ndio yangu kwanza" and move on confidently

✓ C. Walk away calmly and focus on his own goals without seeking their approval

D. Agree with them and promise to try soon

5. Which of the following are TRUE about teenage pregnancy and school dropout in Kenya? ✓ C, D

A. About 1,000

B. About 5,000

✓ C. Over 13,000

✓ D. Teenage pregnancy is the leading cause of school dropout among girls in Kenya

6. Which of the following are genuine consequences of early sexual activity among Kenyan teens?

✓ A, D

✓ A. Risk of HIV/STIs

B. No lasting health impact — early sex is generally safe for teenagers

C. Improved academic performance

✓ D. Emotional regret and anxiety

7. Which of the following correctly describe what choosing abstinence demonstrates about a person?

✓ C, D

A. That they are immature and childish

B. That they have no romantic relationships

✓ C. Self-control, clear values, and respect for their own body

✓ D. Strength of character and the ability to prioritise long-term goals over short-term pressure

8. Which of the following are TRUE about HIV infections among young people aged 15–24 in Kenya?

✓ B, C

A. 1 in 10

✓ B. 1 in 4

✓ C. Adolescents aged 15–24 are the most at-risk group for new HIV infections in Kenya

D. 1 in 100

Mercy was a top student at 16. Her boyfriend pressured her and she became pregnant at 17. She sat her KCSE two years late.

9. Which of the following correctly explain what happened to Mercy's education? ✓ C, D

A. She was not intelligent enough

B. Her school cancelled her registration

✓ C. She dropped out due to teenage pregnancy

✓ D. The boyfriend's emotional pressure and the resulting pregnancy disrupted her educational plans entirely

10. Which of the following are strong reasons for choosing abstinence as a teenager? ✓ A, C

✓ A. Abstinence preserves all future options — health, education, and emotional wellbeing simultaneously

B. Because teachers say so

✓ C. It provides 100% protection AND preserves educational and emotional wellbeing

D. No one will want to date you anyway

Lesson 8: Alcohol

1. Which of the following are TRUE about why chang'aa is more dangerous than commercial beer?

✓ B, D

A. It is much cheaper to produce

✓ B. Possible methanol contamination causing blindness and death

C. It has a stronger flavour

✓ D. Illicitly brewed alcohol frequently contains dangerous additives like battery acid or methanol

2. Which of the following brain regions are most damaged by alcohol in adolescents?

✓ B, C

A. Cerebellum — controls balance

✓ B. The hippocampus — alcohol impairs memory formation, explaining why heavy drinkers black out

✓ C. Prefrontal cortex — judgment, impulse control, planning

D. Amygdala — processes fear

3. Which of the following are appropriate DARE responses for Njeri to "One beer won't hurt — everyone drinks at our age"?

✓ A, D

✓ A. "No thank you — I'll have a soda instead. I need to be sharp for training tomorrow."

B. Drink one to avoid awkwardness and fit in

C. Pretend to drink but pour it away

✓ D. Use a prepared line: "I'm on medication — I can't mix with alcohol tonight"

4. Which of the following are TRUE about blood alcohol concentration and driving in Kenya?

✓ B, D

A. Above 0.15% BAC

✓ B. Above 0.08% BAC

C. Above 0.20% BAC

✓ D. For drivers under 18, Kenya applies zero tolerance — any alcohol is a criminal offence

5. Which of the following are signs of serious alcohol intoxication requiring immediate emergency care?

✓ C, D

A. Slurred speech and impaired coordination

B. Flushed face and increased confidence

✓ C. Blue-tinged lips or fingertips — a sign of oxygen deprivation from respiratory depression

✓ D. Unconsciousness or unresponsiveness

6. Which of the following are valid helpline numbers for alcohol and substance abuse support in Kenya? **✓ C, D**

A. 0800 720 715

B. 1190

✓ C. 0800 723 253

✓ D. 116 — Childline Kenya also provides alcohol and substance abuse counselling for young people

7. Which of the following explain why adolescents are more at risk from alcohol than adults? **✓ A, D**

✓ A. Their brains are still developing, making them more vulnerable to addiction and cognitive damage

B. They weigh less so alcohol affects them faster

C. They mix alcohol with soft drinks which increases toxicity

✓ D. Earlier onset of drinking dramatically increases lifetime risk of alcohol dependence

8. Which of the following correctly describe what Kevin's brother's behaviour indicates? **✓ C, D**

A. He is hungry and needs food

B. He is experiencing a severe hangover

✓ C. He has alcohol dependence and is experiencing withdrawal symptoms

✓ D. Alcohol withdrawal can be life-threatening — seizures may occur without medical supervision

9. Which of the following are TRUE about "moderate drinking" for Kenyan adolescents? **✓ C, D**

A. 1–2 drinks per day is safe for anyone over 16

B. Mixing alcohol with food eliminates health risks

✓ C. Even one drink impairs reaction time and judgment — no amount is truly safe for adolescents

✓ D. There is no safe level of alcohol for adolescents under 18

10. Which of the following are appropriate actions for Amina when she notices these warning signs in Juma? **✓ B, D**

A. Report him to the headteacher immediately without talking to him first

✓ B. Talk to Juma privately and with care: "Nakujali — nimeona mabadiliko, je, uko sawa?"

C. Ignore it — it is not your problem

✓ D. Suggest Juma contacts NACADA (0800 723 253) for confidential free counselling

Lesson 9: GBV

1. Which of the following are TRUE about Gender-Based Violence (GBV)?

✓ B, D

A. Gender-Based Values

✓ B. Gender-Based Violence

C. General Body Violations

✓ D. GBV includes physical, sexual, emotional, and economic violence based on gender

2. Which of the following are forms of GBV?

✓ C, D

A. Playing football

B. Studying together

✓ C. Forced marriage

✓ D. Economic abuse — controlling a woman's access to money, employment, or financial resources

3. Which of the following explain why FGM causes permanent harm?

✓ B, D

A. Is a hygiene practice

✓ B. Removes healthy genital tissue causing lifelong pain

C. Is medically approved

✓ D. FGM violates the right to health, bodily integrity, and is classified as gender-based violence

4. Which of the following are appropriate actions when you witness GBV?

✓ C, D

A. Stay silent

B. Post on social media

✓ C. Report to a trusted adult or authority

✓ D. Contact Childline Kenya (116) or a local Gender Violence Recovery Centre (GVRC)

5. Which of the following are examples of emotional abuse?

✓ B, D

A. Giving gifts

✓ B. Constant insults, threats, and humiliation

C. Helping with chores

✓ D. Gaslighting — making someone doubt their own memory and perception of events

6. Which of the following correctly describe genuine consent?

✓ C, D

A. Forced agreement

B. Agreement under alcohol

✓ C. Free, informed, and reversible agreement

✓ D. Consent requires an enthusiastic clear "yes" — silence or absence of "no" does not mean yes

7. Which of the following correctly describe Kenyan laws that protect against sexual violence?

✓ C, D

A. Land Act

B. Traffic Act

✓ C. Sexual Offences Act 2006

✓ D. The Children Act 2001 also protects children from sexual exploitation and all forms of abuse

8. Which of the following are TRUE about who GBV affects?

✓ C, D

A. Only girls

B. Only rural areas

✓ C. All genders across all communities

✓ D. GBV disproportionately affects women and girls — over 70% of reported cases globally

9. Which of the following correctly describe a passive bystander?

✓ B, D

A. Reports violence immediately

✓ B. Sees harm and does nothing

C. Calls the police

✓ D. A silent bystander who laughs along normalises and enables abusive behaviour

10. Which of the following provide help to GBV survivors in Kenya?

✓ B, D

A. Bus stations

✓ B. Gender Violence Recovery Centres (GVRs)

C. Internet cafes

✓ D. Childline Kenya (116) also connects GBV survivors to local support services

Lesson 10: HIV & STIs

1. Which of the following are TRUE about HIV? ✓ B, D

A. Human Immunity Virus

✓ B. Human Immunodeficiency Virus

C. High Infection Virus

✓ D. HIV attacks and destroys CD4 T-cells, gradually collapsing the body's immune defences

2. Which of the following are TRUE about AIDS? ✓ B, D

A. The person gains weight

✓ B. The immune system is severely damaged and opportunistic infections occur

C. The virus disappears

✓ D. Without ARV treatment, AIDS typically develops within 10 years of HIV infection

3. Which of the following are routes through which HIV is transmitted? ✓ C, D

A. Sharing food or drinks

B. Mosquito bites

✓ C. Unprotected sex, infected blood, and mother-to-child

✓ D. Breastfeeding by an HIV-positive mother without preventive ARVs can transmit HIV to her infant

4. Which of the following correctly describe what ARVs (antiretrovirals) do? ✓ B, D

A. Cure HIV completely

✓ B. Control HIV, allowing people to live long healthy lives

C. Prevent HIV infection

✓ D. ARVs taken correctly reduce viral load to undetectable levels — making a person effectively non-infectious

5. Which of the following STIs are caused by bacteria and can be cured with antibiotics? ✓ C, D

A. HIV

B. Herpes

✓ C. Gonorrhoea

✓ D. Syphilis — another bacterial STI fully curable with penicillin antibiotics

6. Which of the following are effective ways to prevent HIV/STI transmission through sex? ✓ C, D

A. Washing after sex

B. Guessing safe days

✓ C. Abstinence

✓ D. Consistent correct condom use — the most effective method for sexually active people after abstinence

7. Which of the following are TRUE about PrEP?**✓ B, D**

- A. Pre-Recorded Exposure Plan
- C. Post-Rapid Exposure Prevention

✓ B. Pre-Exposure Prophylaxis**✓ D. PrEP reduces HIV infection risk by over 99% when taken consistently every day****8. Which of the following explain why HIV-related stigma is harmful?****✓ B, D**

- A. It helps people recover faster
- C. It makes HIV tests more accurate

✓ B. It discourages people from testing and seeking treatment**✓ D. HIV stigma causes people to delay testing for months or years, allowing the virus to progress****9. Which of the following are TRUE about HIV testing for adolescents in Kenya?****✓ B, D**

- A. Illegal under 18
- C. Expensive and requires parental consent

✓ B. Available free at public health facilities**✓ D. HIV testing results are fully confidential — not shared with parents, schools, or employers****10. Which of the following are TRUE about an HIV-positive person living on ARVs?****✓ C, D**

- A. Never have children

- B. Never work or go to school

✓ C. Live a long healthy life, work, study, and have children**✓ D. With an undetectable viral load on ARVs, an HIV-positive person cannot sexually transmit the virus**

Lesson 11: Life Skills

1. Which of the following accurately describe life skills?

✓ B, D

A. School subjects like maths and science

✓ B. Abilities that help you handle challenges and make responsible decisions

C. Sports and physical activities

✓ D. Life skills include decision-making, critical thinking, empathy, and coping with emotions

2. Which of the following are key elements of effective communication?

✓ B, D

A. Talking as much as possible

✓ B. Sending, receiving, and understanding messages clearly

C. Using complex vocabulary

✓ D. Effective communication also includes understanding non-verbal cues like body language and tone

3. Which of the following correctly describe active listening?

✓ B, D

A. Waiting for your turn to speak

✓ B. Fully concentrating on the speaker, understanding, and responding thoughtfully

C. Nodding without listening

✓ D. Active listening includes asking clarifying questions and reflecting back what you heard

4. Which of the following communication styles are most healthy?

✓ C, D

A. Aggressive — dominating the conversation

B. Passive — never expressing your feelings

✓ C. Assertive — expressing yourself clearly and respectfully

✓ D. Assertive communication uses "I" statements: "I feel... when..." — without blaming others

5. Which of the following are effective ways to handle peer pressure?

✓ B, D

A. Always doing what your friends do

✓ B. Using assertive refusal skills and offering alternatives

C. Avoiding all social situations

✓ D. Calmly walking away with a pre-planned exit line is also an effective peer pressure response

6. Which of the following explain why a trusted adult is important? ✓ B, D

A. They always agree with you

✓ B. They can provide guidance, support, and connect you to help

C. They know all the answers

✓ D. A trusted adult can help navigate crises safely and connect you to professional services

7. Which of the following correctly describe problem-solving steps? ✓ B, D

A. Act → Identify → Evaluate

✓ B. Identify → Generate options → Choose → Act → Reflect

C. Guess → Try → Forget

✓ D. Reflecting on the outcome after acting improves your decision-making skills over time

8. Which of the following are examples of non-verbal communication? ✓ B, D

A. Text messages

✓ B. Body language, facial expressions, eye contact, and tone

C. Phone calls only

✓ D. Tone of voice accounts for approximately 38% of the meaning in face-to-face communication

9. Which of the following correctly describe empathy in communication? ✓ B, D

A. Feeling sorry for someone

✓ B. Understanding and sharing the feelings of another person

C. Ignoring others' problems

✓ D. Empathy requires setting aside your own perspective to genuinely understand another's experience

10. Which of the following are appropriate responses when a friend shares a personal problem?

✓ B, D

A. Change the topic quickly

✓ B. Listen actively, acknowledge feelings, then offer support

C. Tell everyone else immediately

✓ D. Asking open-ended questions ("How are you feeling about this?") shows genuine presence and care

Lesson 12: Self-Awareness

1. Which of the following correctly describe self-awareness?

✓ B, D

A. Knowing everyone else's feelings

✓ B. Understanding your own thoughts, feelings, strengths, and weaknesses

C. Being selfish

✓ D. Self-awareness helps you recognise how your behaviour affects others and take responsibility

2. Which of the following correctly describe self-esteem?

✓ C, D

A. How tall you are

B. How much money you have

✓ C. How you feel about your own worth and value

✓ D. Low self-esteem makes people more vulnerable to peer pressure and unhealthy relationships

3. Which of the following correctly describe a healthy personal boundary?

✓ B, D

A. A wall that keeps everyone away

✓ B. A rule that clarifies what you are and are not comfortable with

C. Always saying yes to others

✓ D. Setting clear boundaries is an act of self-respect that protects your physical and emotional wellbeing

4. Which of the following are TRUE about having high self-esteem?

✓ C, D

A. Follow peer pressure easily

B. Seek validation from everyone

✓ C. Make confident, independent decisions and resist peer pressure

✓ D. People with high self-esteem recover better from failures without losing their sense of worth

5. Which of the following are components of emotional intelligence?

✓ B, D

A. Being smart only in maths

✓ B. Recognising, understanding, and managing your emotions and others'

C. Never showing emotions

✓ D. High emotional intelligence improves relationships, mental health, and conflict resolution

6. Which of the following explain why values are important?**✓ B, D**

A. Tell you what clothes to wear

✓ B. Guide your decisions and behaviour, especially under pressure

C. Are decided by your friends

✓ D. Core values — honesty, respect, courage — form the foundation of personal identity and self-respect

7. Which of the following explain why negative self-talk is harmful?**✓ B, D**

A. Helps you improve

✓ B. Lowers self-esteem and increases anxiety and depression risk

C. Makes others like you more

✓ D. Replacing negative self-talk with compassionate statements is a core cognitive behavioural strategy

8. Which of the following correctly describe setting a boundary with a friend?**✓ B, D**

A. You hate them

✓ B. Calmly explaining what you can and cannot do going forward

C. Ending the friendship immediately

✓ D. Healthy boundaries include the right to say "I need time to think before I respond to that"

9. Which of the following are effective ways to discover your personal strengths?**✓ B, D**

A. Waiting for others to tell you

✓ B. Reflecting on what you enjoy, what you do well, and what others appreciate about you

C. Copying your most popular classmate

✓ D. Journalling your daily reactions helps identify emotional patterns and personal strengths over time

10. Which of the following explain how assertiveness differs from aggression?**✓ B, D**

A. Gets what you want at any cost

✓ B. Expresses your rights while respecting others' rights too

C. Involves raising your voice

✓ D. Assertiveness means being direct and honest — using calm, clear language and confident eye contact

Lesson 13: Peer Education

1. Which of the following correctly describe peer education?

✓ B, D

A. Teachers educating younger students

✓ B. Young people sharing health and life knowledge with their age-mates

C. Parents advising their children

✓ D. Peer education is most effective for health topics where young people feel embarrassed to ask adults

2. Which of the following explain why peer educators are effective?

✓ B, D

A. They are older than the students

✓ B. They share similar experiences and language, making messages relatable

C. They are paid professionals

✓ D. Peer educators use youth-friendly language and real-life scenarios that resonate with their age group

3. Which of the following are qualities of a good peer educator?

✓ B, D

A. Be popular on social media

✓ B. Have accurate knowledge and model healthy behaviour

C. Know everyone's secrets

✓ D. A peer educator must also be trustworthy, non-judgmental, and willing to refer to professional help

4. Which of the following correctly describe confidentiality in peer education?

✓ B, D

A. Sharing everything you hear with friends

✓ B. Keeping personal information private unless there is a safety risk

C. Never keeping any secrets

✓ D. When safety is at risk, confidentiality can be broken — this is called a safeguarding override

5. Which of the following are peer education methods?

✓ B, D

A. Formal exam setting

✓ B. Drama, role-play, and discussion circles

C. Lecturing for 2 hours

✓ D. Small group activities and storytelling make sensitive health topics more accessible and memorable

6. Which of the following are appropriate responses when a peer says something factually wrong?

✓ C, D

A. Embarrass them publicly

B. Stay silent to avoid conflict

✓ C. Gently correct with accurate information and a reliable source

✓ D. After correcting misinformation, offer a reliable source — like WHO Kenya or Ministry of Health

7. Which of the following correctly describe positive peer influence?

✓ B, D

A. Pressuring friends to follow your lifestyle

✓ B. Encouraging friends to make healthy, responsible choices

C. Copying whatever is popular

✓ D. Positive peer influence uses social connection to reinforce healthy norms within the group

8. Which of the following correctly describe referral in peer education?

✓ B, D

A. Sending a friend to the library

✓ B. Directing a peer to a professional or service that can help them

C. Writing a recommendation letter

✓ D. When referring, always provide specific contact details — counsellor's name and clinic hours

9. Which of the following explain why peer education is particularly important for SRH?

✓ A, D

✓ A. Young people prefer to learn from their peers about sensitive topics

B. Adults know nothing about SRH

C. SRH is not taught in schools

✓ D. Peer educators create a safe non-judgmental space where sensitive questions can be asked freely

10. Which of the following are key ethical responsibilities of a peer educator?

✓ C, D

A. Sharing everyone's private stories as examples

B. Only giving your personal opinion

✓ C. Being accurate, non-judgmental, and maintaining confidentiality

✓ D. A peer educator always prioritises the person's wellbeing above winning any argument or debate

Lesson 14: Adolescent Growth

1. Which of the following correctly describe adolescence?

✓ B, D

- A. 0–5 years
- C. 20–30 years

✓ B. 10–19 years

✓ D. Adolescence is also defined as the transition period from childhood to adulthood

2. Which of the following correctly describe what triggers puberty?

✓ B, D

- A. Eating too much sugar
- C. Peer pressure

✓ B. Hormones released by the brain (pituitary gland)

✓ D. The key puberty hormones are oestrogen in girls and testosterone in boys — with both present in all genders

3. Which of the following are physical changes in puberty common to BOTH boys and girls?

✓ C, D

- A. Voice breaking

- B. Breast development

✓ C. Growth spurt and pubic/underarm hair

✓ D. Increased sweating and body odour are puberty changes experienced by both boys and girls

4. Which of the following correctly describe menstruation?

✓ B, D

- A. A disease that needs treatment
- C. A sign of illness

✓ B. The monthly shedding of the uterine lining when no egg is fertilised

✓ D. Menstruation indicates the reproductive system is maturing and working normally

5. Which of the following correctly describe the role of testosterone?

✓ B, D

- A. Female puberty changes
- C. Emotional mood swings in girls only

✓ B. Male puberty changes including voice breaking, muscle growth, facial hair

✓ D. Testosterone also causes increased muscle mass, bone density, and growth of facial and body hair

6. Which of the following explain what causes mood swings during adolescence?

✓ B, D

A. Bad parenting

✓ B. Hormonal fluctuations affecting brain chemistry

C. Social media only

✓ D. The adolescent prefrontal cortex is still developing, contributing to emotional intensity and impulsivity

7. Which of the following are healthy responses to acne during puberty?

✓ C, D

A. Squeezing and picking at them

B. Feeling deeply ashamed

✓ C. Regular gentle washing and seeking medical advice if severe

✓ D. Acne affects over 85% of adolescents — it is caused by excess sebum and bacteria, not poor hygiene

8. Which of the following correctly describe the identity crisis in adolescence?

✓ B, D

A. Forgetting your name

✓ B. The process of exploring 'who am I?' — values, roles, and future

C. A mental illness

✓ D. Identity formation involves trying different values, roles, and groups — this is healthy and normal

9. Which of the following are TRUE about wet dreams (nocturnal emissions) in boys?

✓ C, D

A. A sign of disease

B. Caused by evil spirits

✓ C. A normal part of puberty — the body's natural release of semen

✓ D. Nocturnal emissions require no treatment — they are normal physiology during puberty

10. Which of the following are appropriate sources of support for a young person during adolescence?

✓ B, D

A. Keeping all changes secret and handling them alone

✓ B. Talking to trusted adults, peers, and healthcare workers

C. Searching only on social media

✓ D. Healthcare workers and school nurses are trained to support adolescents through puberty confidentially

Lesson 15: Menstrual Health

1. Which of the following correctly describe the menstrual cycle?

✓ B, D

A. The last day of one period to the last day of the next

✓ B. The first day of one period to the first day of the next

C. The middle of one period to the middle of the next

✓ D. A healthy cycle ranges from 21 to 35 days — not all women have exactly 28-day cycles

2. Which of the following correctly describe ovulation?

✓ B, D

A. The start of menstruation

✓ B. The release of a mature egg from the ovary

C. The end of puberty

✓ D. Ovulation typically occurs around Day 14 of a 28-day cycle — the only time pregnancy is possible

3. Which of the following are TRUE about normal menstrual flow?

✓ B, D

A. 1–2 days

✓ B. 3–7 days

C. 2–3 weeks

✓ D. Bleeding heavier or lighter than usual for more than 2 cycles should be discussed with a health provider

4. Which of the following correctly describe dysmenorrhoea?

✓ B, D

A. Absence of menstruation

✓ B. Painful menstruation (period cramps)

C. Very heavy bleeding

✓ D. Dysmenorrhoea affects up to 90% of adolescent girls and can be managed with a warm compress and paracetamol

5. Which of the following are TRUE about menstrual cycles shorter than 21 days or longer than 35 days?

✓ B, D

A. Perfectly normal for all girls

✓ B. Irregular and worth mentioning to a healthcare provider

C. A sign of pregnancy

✓ D. Stress, extreme exercise, or significant weight changes can also disrupt the menstrual cycle

6. Which of the following are symptoms of Premenstrual Syndrome (PMS)? ✓ B, D

A. Only physical pain

✓ B. Mood changes, bloating, breast tenderness, and fatigue before the period

C. Fever and rash

✓ D. PMS symptoms typically appear 3–10 days before the period and resolve when menstruation begins

7. Which of the following are safe and hygienic menstrual products for school-going girls in Kenya?

✓ B, D

A. Pieces of old clothing without washing

✓ B. Clean disposable pads or well-maintained reusable cloth pads

C. Leaves from the garden

✓ D. Menstrual cups and period underwear are also safe, cost-effective, and environmentally friendly options

8. Which of the following correctly describe period poverty? ✓ B, D

A. Earning less money during your period

✓ B. Lack of access to menstrual products, clean water, or safe sanitation

C. A rare condition in wealthy countries only

✓ D. Period poverty affects 1 in 10 girls in Sub-Saharan Africa, contributing to high rates of school absence

9. Which of the following are reliable ways to manage mild period cramps? ✓ B, D

A. Drinking very cold water only

✓ B. Warm compress on the abdomen, gentle exercise, and staying hydrated

C. Avoiding all food

✓ D. Paracetamol or ibuprofen can help severe cramps — see a doctor if pain is not controlled by medication

10. Which of the following are TRUE about what menstruation signifies? ✓ C, D

A. Is sick

B. Is cursed

✓ C. Is functioning normally and is reproductively maturing

✓ D. Menstruation myths cause unnecessary shame and school absenteeism — education breaks the stigma

Lesson 16: Reproductive Anatomy

1. Which of the following correctly describe the uterus? ✓ C, D

A. Ovary

B. Fallopian tube

✓ C. Uterus (womb)

✓ D. The uterus is lined with endometrium — tissue that thickens each cycle and sheds as menstruation

2. Which of the following correctly describe where and how fertilisation occurs? ✓ C, D

A. The uterus

B. The ovary

✓ C. The fallopian tube

✓ D. After fertilisation the embryo travels down the fallopian tube to implant in the uterine wall

3. Which of the following correctly describe the role of the testes? ✓ C, D

A. Penis

B. Prostate gland

✓ C. Testis (testicle)

✓ D. The testes also produce testosterone — the primary male sex hormone driving puberty changes

4. Which of the following correctly describe the cervix? ✓ B, D

A. The outer female genitalia

✓ B. The lower narrow part of the uterus that connects to the vagina

C. The organ that produces eggs

✓ D. The cervix is screened by a Pap smear to detect early signs of cervical cancer — from age 25

5. Which of the following are TRUE about how many eggs a woman releases per menstrual cycle? ✓ B, D

A. 10–20

✓ B. 1 (occasionally 2)

C. 100

✓ D. Women are born with all their eggs (1–2 million at birth) — no new eggs are produced after birth

6. Which of the following correctly describe the epididymis in the male reproductive system?

✓ B, D

A. Produces the male hormone testosterone

✓ B. Is where sperm mature and are stored temporarily

C. Transports urine only

✓ D. The vas deferens carries mature sperm from the epididymis to the urethra for ejaculation

7. Which of the following are TRUE about when ovulation occurs in a 28-day cycle?

✓ C, D

A. Day 1

B. Day 7

✓ C. Day 14

✓ D. Ovulation timing can vary due to stress, illness, or weight changes — making safe days unreliable

8. Which of the following correctly describe the functions of the vagina?

✓ B, D

A. Producing eggs

✓ B. Birth canal, passage for menstrual flow, and reception of the penis during intercourse

C. Storing sperm permanently

✓ D. The vagina has a naturally acidic environment that protects against many bacterial infections

9. Which of the following are TRUE about how long sperm can survive inside the female reproductive tract?

✓ B, D

A. 30 minutes

✓ B. 5 days

C. 2 weeks

✓ D. This is why the "safe days" method is unreliable — sex days before ovulation can still cause pregnancy

10. Which of the following are key reasons to learn about reproductive anatomy?

✓ B, D

A. To pass biology exams only

✓ B. To understand your body, recognise health problems early, and make informed decisions

C. It is only relevant for medical students

✓ D. Reproductive anatomy knowledge helps make informed decisions about sexual health and contraception

Lesson 17: FGM

1. Which of the following correctly describe FGM?

✓ B, D

- A. Female General Medicine
- C. Female Growth Monitoring

✓ B. Female Genital Mutilation

✓ D. FGM is a violation of human rights and a form of gender-based violence recognised by the UN and WHO

2. Which of the following explain why FGM is harmful?

✓ B, D

- A. Is painful but heals quickly with no lasting effects
- C. Reduces infection risk

✓ B. Causes permanent physical and psychological harm with no health benefit

✓ D. No medical organisation in the world approves FGM — it has been unanimously condemned globally

3. Which of the following correctly describe FGM's legal status in Kenya?

✓ B, D

- A. Land Act 2012
- C. Traffic Act

✓ B. Prohibition of Female Genital Mutilation Act 2011

✓ D. The FGM Act 2011 carries penalties of up to 3 years imprisonment for performing or facilitating FGM

4. Which of the following are immediate physical complications of FGM?

✓ B, D

- A. Improved fertility
- C. Better menstrual health

✓ B. Severe bleeding, infection, and shock

✓ D. Unsterilised FGM tools can also transmit HIV, tetanus, and hepatitis between victims

5. Which of the following are long-term consequences of FGM?

✓ B, D

- A. Increased sexual pleasure
- C. Better hygiene

✓ B. Chronic pain, difficult childbirth, fistula, and PTSD

✓ D. Long-term FGM complications also include recurrent UTIs and painful sexual intercourse

6. Which of the following explain why communities practise FGM?

✓ B, D

A. Medical advice from doctors

✓ B. Social and cultural norms, marriageability, and gender control

C. Scientific research findings

✓ D. FGM perpetuates gender inequality by making women's worth dependent on physical modification

7. Which of the following correctly describe 'medicalised FGM'?

✓ B, D

A. Safe and acceptable

✓ B. Still illegal and harmful — medicalisation does not make FGM safe

C. Recommended by WHO for safety

✓ D. Medicalised FGM is condemned by WHO, UNICEF, and all major health bodies — it remains illegal in Kenya

8. Which of the following correctly describe alternative rites of passage (ARP)?

✓ B, D

A. Circumcision

✓ B. Alternative Rites of Passage (ARP)

C. Defibulation

✓ D. ARPs celebrate a girl's transition through education and community celebration — without any cutting

9. Which of the following are appropriate actions when you know a girl is at risk of FGM?

✓ B, D

A. Mind your own business

✓ B. Report immediately to a teacher, social worker, or call Childline 116

C. Tell the girl's mother only

✓ D. In Kenya, failing to report a known FGM case is also a criminal offence under the 2011 Act

10. Which of the following are ways boys and men can help end FGM?

✓ B, D

A. Supporting families who practise it

✓ B. Refusing to marry only cut women, speaking out against FGM, and supporting girls

C. Staying neutral and not commenting

✓ D. Men and boys can educate male peers that FGM is not required for a girl to be marriageable

Lesson 18: Social Media & SRH

1. Which of the following explain how social media can positively impact SRH? ✓ B, D

A. Spreading myths and misinformation

✓ B. Providing access to accurate health information and peer support communities

C. Promoting harmful body image ideals

✓ D. Social media platforms also host peer support communities for young people facing health challenges

2. Which of the following correctly describe online grooming? ✓ B, D

A. Sharing beauty tips online

✓ B. A predator building trust with a young person online to exploit them sexually

C. Learning to code online

✓ D. Online groomers target young people aged 11–17 on gaming platforms, social media, and messaging apps

3. Which of the following are warning signs of online grooming? ✓ B, D

A. Someone asking for your school assignment

✓ B. An adult online who asks for private photos, wants to meet alone, or asks you to keep the friendship secret

C. Getting too many study resources

✓ D. A groomer tries to isolate the young person by encouraging secrecy and turning them against trusted adults

4. Which of the following explain why sexting (sending sexual images) is risky? ✓ B, D

A. It uses too much data

✓ B. Images can be shared without consent, causing harm, blackmail, and legal consequences

C. It is always illegal everywhere

✓ D. Once shared online, an image can never be fully deleted — it may resurface years later causing harm

5. Which of the following are effects of comparing your body to social media images? ✓ B, D

A. Better body image

✓ B. Body dissatisfaction, low self-esteem, and disordered eating

C. Stronger motivation to exercise healthily

✓ D. Social comparison on social media activates the same brain circuits as real-life social rejection

6. Which of the following correctly describe critical media literacy?

✓ B, D

A. Reading only news articles

✓ B. The ability to evaluate, question, and analyse media messages rather than accepting them uncritically

C. Sharing everything you read online

✓ D. Critical media literacy helps identify sponsored content, deepfakes, and health misinformation online

7. Which of the following correctly describe what the Computer Misuse and Cybercrimes Act 2018 covers?

✓ B, D

A. Only applies to adults over 21

✓ B. Criminalises cyberbullying, non-consensual sharing of intimate images, and online sexual harassment

C. Is only for businesses

✓ D. The Cybercrimes Act 2018 also covers online sexual exploitation of minors

8. Which of the following are healthy digital habits for adolescents?

✓ B, D

A. Being online 24/7

✓ B. Setting screen time limits, using privacy settings, and taking digital breaks

C. Sharing your location with all followers

✓ D. Using strong unique passwords and two-factor authentication protects your accounts from being hacked

9. Which of the following are appropriate actions when someone shares your intimate images without consent?

✓ B, D

A. Feel ashamed and delete all your accounts

✓ B. Document it, report to Childline 116 or police, and seek support

C. Ignore it and hope it goes away

✓ D. Non-consensual sharing of intimate images is a criminal offence under Kenya's Cybercrimes Act 2018

10. Which of the following explain why social media misinformation about SRH is dangerous?

✓ B, D

A. It uses too many characters

✓ B. Young people may act on false information, leading to risky behaviour or avoiding care

C. It makes social media less fun

✓ D. SRH myths like "you can't get pregnant the first time" or "condoms always fail" lead to dangerous choices

Lesson 19: Career & Decisions

1. Which of the following correctly describe the first step in making a good career decision? ✓ B, D

A. Choosing whichever career pays the most money

✓ B. Self-discovery — understanding your strengths, values, interests, and personality before exploring options

C. Following your parents' or friends' career choice

✓ D. Holland's career theory suggests matching careers to your personality leads to greater job satisfaction

2. Which of the following correctly describe TVET (Technical and Vocational Education and Training) in Kenya? ✓ B, D

A. Is only for students who fail university entry

✓ B. Provides practical, industry-recognised qualifications in trades, healthcare, ICT, and more — often leading to employment faster than university and at lower cost

C. Is less respected than university degrees in Kenya

✓ D. TVET graduates in Kenya can earn competitive salaries — skilled artisans often earn more than graduates

3. Which of the following are skills that AI CANNOT replace in the workplace? ✓ B, D

A. Calculating large datasets quickly

✓ B. Human empathy, ethical judgment, creative problem-solving, and leadership of people

C. Translating documents between languages

✓ D. Interpersonal communication, leadership, and emotional intelligence are skills AI cannot replicate

4. Which of the following career sectors are large employers and growing opportunities for young people in Kenya? ✓ B, D

A. Tech startups only

✓ B. Agriculture and agri-business — employing over 40% of Kenyans and transforming with modern techniques

C. International airlines

✓ D. Blue economy sectors — fisheries, tourism, and marine resources — offer growing career opportunities

5. Which of the following correctly describe entrepreneurship as a career path in Kenya? ✓ B, D

A. Is only possible with large amounts of start-up capital

✓ B. Is a legitimate and growing path — especially with mobile money (M-Pesa), low-cost digital tools, and youth enterprise funds available

C. Rarely succeeds in Kenya

✓ D. Youth enterprise funds (YEDF, Uwezo Fund) and SACCO cooperatives provide startup capital for young entrepreneurs

6. Which of the following correctly describe the Kenyan Jua Kali sector? ✓ B, D

A. A government ministry for weather

✓ B. The informal economy of artisans, craftspeople, welders, mechanics, tailors, and small manufacturers — a major source of employment and income

C. A type of university scholarship

✓ D. The Jua Kali sector contributes approximately 18% of Kenya's GDP and employs over 7 million people

7. Which of the following correctly describe 'lifelong learning' in the context of career planning?

✓ B, D

A. Studying at university for many years without stopping

✓ B. Continuously developing new skills and knowledge throughout your career — because the job market changes and those who stop learning get left behind

C. Reading the same books every year

✓ D. The World Economic Forum predicts 65% of today's students will work in jobs that don't yet exist

8. Which of the following correctly describe a mentor in career development? ✓ B, D

A. Someone who does all your career planning for you

✓ B. An experienced person in your field of interest who shares knowledge, opens doors, and guides your growth — one of the most valuable career assets

C. A person who only gives you money for your business

✓ D. A good mentor also introduces you to their professional network, opening doors to opportunities

9. Which of the following correctly describe a 'portfolio' in career terms?

✓ B, D

A. A wallet for keeping money

✓ B. A collection of your work samples, projects, certificates, and achievements that demonstrates your skills and value to potential employers or clients

C. A government document for job seekers

✓ D. A digital portfolio on LinkedIn, GitHub, or Behance dramatically increases your visibility to employers

10. Which of the following are important financial habits for a young Kenyan starting their first job or business?

✓ B, D

A. Spending all earnings to enjoy life while young

✓ B. Saving and investing a portion of every income — even small amounts — consistently from the start, using tools like M-Pesa savings, SACCOs, or bank accounts

C. Borrowing money to invest immediately

✓ D. KES 500/month saved from age 18 grows to over KES 1.4 million by age 60 through compound interest

Lesson 20: UTIs

1. Which of the following correctly describe a UTI (Urinary Tract Infection)?

✓ B, D

A. A sexually transmitted infection only

✓ B. An infection of any part of the urinary system by bacteria

C. A skin condition

✓ D. The most common UTI cause is E. coli bacteria — normally gut bacteria transferred to the urethra

2. Which of the following are common symptoms of a UTI?

✓ B, D

A. Chest pain

✓ B. A burning sensation when urinating and frequent urge to urinate

C. Hair loss

✓ D. Cloudy, dark, or foul-smelling urine is also a classic sign of a UTI requiring attention

3. Which of the following explain why girls and women are more prone to UTIs than boys?

✓ B, D

A. Their immune systems are weaker

✓ B. The female urethra is shorter, making it easier for bacteria to reach the bladder

C. They drink more water

✓ D. Hormonal changes during menstruation can temporarily affect the bladder's natural defences against infection

4. Which of the following are effective ways to prevent a UTI?

✓ B, D

A. Avoiding all liquids

✓ B. Drinking plenty of water, urinating frequently, and wiping front to back

C. Taking antibiotics every week as prevention

✓ D. Urinating after sexual activity helps flush bacteria from the urethra, reducing UTI risk significantly

5. Which of the following explain how an untreated UTI can become dangerous?

✓ B, D

A. You drink too much water

✓ B. The infection spreads to the kidneys (pyelonephritis)

C. You stop eating sugar

✓ D. Untreated kidney infections (pyelonephritis) can cause permanent kidney scarring and even sepsis

6. Which of the following correctly describe what cloudy, dark, or foul-smelling urine may indicate?

✓ B, D

A. Good health

C. Too much vitamin C

✓ B. Dehydration or a possible UTI

✓ D. Consistently dark or cloudy urine should be evaluated to rule out infection or kidney disease

7. Which of the following habits increase UTI risk?

✓ B, D

A. Drinking 8 glasses of water daily

C. Wearing cotton underwear

✓ B. Holding urine for very long periods and wiping back to front

✓ D. Wearing tight synthetic underwear traps moisture creating conditions where bacteria multiply quickly

8. Which of the following correctly describe the treatment for a confirmed UTI?

✓ B, D

A. Drinking lemon juice and hoping it clears

C. Ignoring it until it goes away on its own

✓ B. A prescribed course of antibiotics completed in full

✓ D. Stopping antibiotics early — even if symptoms improve — allows resistant bacteria to survive and cause relapse

9. Which of the following correctly describe how recurrent UTIs (more than 3 per year) should be managed?

✓ B, D

A. Accepted as normal

C. Treated only with home remedies

✓ B. Investigated by a doctor — they may indicate an underlying condition

✓ D. Risk factors for recurrent UTIs include diabetes, kidney stones, and anatomical abnormalities

10. Which of the following are simple daily habits that reduce UTI risk?

✓ B, D

A. Eating more salt

C. Avoiding all physical activity

✓ B. Drinking at least 8 glasses of water daily

✓ D. Vitamin C-rich foods (oranges, tomatoes) make urine more acidic, helping prevent bacterial growth

Lesson 21: Shisha

1. Which of the following are TRUE about how much tar one shisha session produces compared to smoking one cigarette? **✓ C, D**

A. 5 times more

B. 10 times more

✓ C. 36 times more

✓ D. A single shisha session also delivers far more carbon monoxide than a single cigarette

2. Which of the following explain why the water in a shisha pipe does NOT make it safer? **✓ B, D**

A. The water evaporates before filtering anything

✓ B. Water only cools the smoke — toxins like CO, nicotine and tar still pass through unchanged

C. Water turns chemicals into harmless vapour

✓ D. Sweet fruit flavours and pleasant smell of shisha are marketing tactics that mask toxic chemicals

3. Which of the following infections can be transmitted by sharing a shisha pipe? **✓ C, D**

A. Only herpes simplex virus

B. Only tuberculosis

✓ C. Oral herpes, COVID-19, and other respiratory viruses can spread through shared mouthpieces

✓ D. Tuberculosis, herpes, hepatitis and respiratory infections

4. Which of the following correctly describe how much nicotine one shisha session delivers? **✓ C, D**

A. Equivalent to half a cigarette

B. Equivalent to 2 cigarettes

✓ C. Equivalent to 10 cigarettes

✓ D. Shisha tobacco contains nicotine — regular users develop dependence just as they would with cigarettes

5. Which of the following correctly describe shisha's status under Kenya's Tobacco Control Act 2007? **✓ B, D**

A. Is completely unregulated and legal for all ages

✓ B. Is covered under tobacco law — sale to under-18s is illegal and smoking in public is banned

C. Is legal for people over 16

✓ D. Shisha lounges serving minors or operating near schools face fines and closure under Kenya's tobacco law

6. Which of the following toxic metals found in shisha smoke come primarily from the hookah equipment itself? **✓ A, D**

✓ A. Lead and arsenic from the metal pipes and fittings

B. Nicotine from the tobacco

C. Tar from the flavouring chemicals

✓ D. Carbon monoxide from charcoal combustion is a major toxic product — it binds haemoglobin reducing oxygen

7. Which of the following accurately describe herbal (tobacco-free) shisha? **✓ C, D**

A. Completely safe because it contains no tobacco

B. Slightly less harmful but still contains some nicotine

✓ C. Still harmful because charcoal combustion produces CO, benzene and other toxins regardless of tobacco

✓ D. Herbal shisha without tobacco still burns charcoal — all CO and benzene risks fully remain

8. Which of the following are accurate factual responses to the claim "Shisha is just flavoured steam — not a real drug"? **✓ C, D**

A. Agree and try it once to be polite

B. Ignore them and walk away without explanation

✓ C. Share a fact: "One shisha session = 10 cigarettes of smoke — I'll pass, thanks"

✓ D. Say: "Actually, shisha smoke contains nicotine, tar, and carbon monoxide — one session equals 10 cigarettes of nicotine and 36 cigarettes of tar."

9. Which of the following explain why benzene found in shisha smoke is particularly dangerous? **✓ A, D**

✓ A. Is a known cause of leukaemia (blood cancer)

B. Makes the smoke smell unpleasant

C. Causes immediate respiratory failure

✓ D. Benzene from charcoal also damages bone marrow, suppressing the production of blood cells

10. Which of the following are TRUE about a hookah lounge's "nicotine-free, organic fruit shisha" product? **✓ B, D**

A. Is completely safe as it contains no nicotine or tobacco

✓ B. Still exposes users to charcoal toxins including CO, benzene and heavy metals from equipment

C. Is legal to sell to under-18s because it has no tobacco

✓ D. Herbal shisha carries the same lung cancer, cardiovascular, and infection risks as tobacco shisha

Lesson 22: Miraa / Khat

1. Which TWO chemicals in miraa are responsible for its mind-altering (psychoactive) effects?

✓ A, C

✓ A. Cathinone

B. Caffeine

✓ C. Cathine

D. Nicotine

2. Which TWO statements correctly describe how miraa affects the brain?

✓ A, C

✓ A. It releases dopamine causing euphoria and energy

B. It slows down the central nervous system

✓ C. It increases norepinephrine causing alertness and high blood pressure

D. It reduces heart rate and calms anxiety

3. Which TWO are short-term effects that users experience when chewing miraa?

✓ B, C

A. Improved sleep quality

✓ B. Euphoria (feeling of happiness and excitement)

✓ C. Increased energy and reduced fatigue

D. Better concentration in school

4. Which TWO are long-term health consequences of regularly chewing miraa?

✓ B, C

A. Improved cardiovascular fitness

✓ B. Oral cancer risk and severe tooth decay

✓ C. Chronic high blood pressure and stroke risk

D. Stronger immune system

5. Which TWO statements about miraa and dependence are correct?

✓ A, C

✓ A. Miraa causes significant psychological dependence

B. Miraa has the same severe physical withdrawal as heroin

✓ C. WHO classifies khat as a drug of abuse

D. Miraa is completely harmless and non-addictive

6. Which TWO are warning signs that a person may be dependent on miraa?

✓ A, C

✓ A. Chewing every day and feeling very unwell if they skip a day

B. Chewing miraa once a month at social events

✓ C. Spending most of their income on miraa while family goes without basics

D. Feeling energetic and productive after chewing

7. Which TWO facts about miraa's legal status and origin are correct?

✓ A, B

✓ A. Miraa is legal to grow and sell in Kenya

✓ B. Miraa is banned in some countries such as the UK and USA

C. Miraa is illegal in all African countries

D. Miraa is mainly grown in Nairobi County

8. Which TWO are effective ways to refuse miraa when offered by peers?

✓ B, C

A. Say nothing and accept to avoid conflict with friends

✓ B. 'No thanks — I'm watching my health'

✓ C. Simply walk away and stay firm in your decision

D. Agree to try just once so friends don't feel rejected

9. Which TWO helplines provide support for drug dependence in Kenya?

✓ A, C

✓ A. NACADA — call 1192 (free counselling and referrals)

B. Kenya Revenue Authority — call 0800 (tax compliance)

✓ C. Childline Kenya — call 116 (free, 24/7 child support)

D. Kenya Bureau of Standards — product safety certification

10. Which TWO statements correctly describe cathinone, the main chemical in miraa?

✓ A, C

✓ A. It is similar in effect to amphetamine

B. It is most potent in dried or old miraa

✓ C. It degrades rapidly after harvest — users prefer fresh miraa within 48 hours

D. It is a sedative that relaxes and calms the brain
